

LemonAID for the Gulf

(Coordinated by the Circle C

Child Development Center Staff & Parents)

Our goal is to raise money to donate to charities working in the in the gulf to help save the wildlife and to clean up our coasts. Want to help? Here are a few ways you can get involved!

- **Staffing the stand and volunteering:** The stand will be open outside the Circle C Swim Center on Fridays from 9 to 5 p.m. – weather permitting – through the rest of Summer. Our last stand will be on August 20th!
- **Staffing the stand:** We need volunteers (parents and children alike!) to help staff the stand. There is a volunteer signup sheet outside the office at the CDC. Please let us know if you can help for even 30 minutes on any of our Fridays!
- **Bringing supplies:** We will certainly need lemonade mix, pitchers, signs and cups. So if you can donate those, please do! Drop off supplies at the CDC office. This would be a great opportunity for local area businesses as well so spread the word.
- **Selling t-shirts:** By mid-July, we will have t-shirts available for purchase at the CDC. We'll send out another email blast when these are available for purchase.
- **Spreading the word:** Please make sure you tell your friends and family and neighbors about this effort so they stop by and donate to the cause! Post it on Facebook on Friday, tweet about it, if you have friends that work for the newspaper or news stations, let them know!!!

The Charities – Where the Money Will Go?

We plan to donate our earnings to a couple of charities. As of today, we're focused on the National Wildlife Federation. Please send any suggestions for charities that you feel are really focused on this effort and are in need of support to melaniemsommer@yahoo.com.

Beyond Circle C Child Development Center

Miss Frankie (with the CDC) is also working to spread the effort out to other elementary schools and summer camps. If you're neighborhood, church, camp, or school would like to participate, we'd support additional stands popping up around the Central Texas region.
